

Boom Lift License Coquitlam

Boom Lift License Coquitlam - Only completely certified individuals must operate an aerial boom lift. Qualification could be attained through a combination of classroom sessions and practical training with the particular kind of aerial lift which would be utilized on the job. A License is needed for any individual who operates or works on an aerial boom lift.

Vehicle-mounted aerial devices comprise the following work vehicles: aerial ladders, extensible boom platforms, vertical towers, articulating boom platforms, and any combination of these types.

There are some basic safety regulations which apply to all boom lifts. Worker safety whilst within the basket is a main concern. Workers should put on a body harness and lanyard connected to the basket or boom. Never tie off to an equipment, an adjacent pole or a structure. Personnel must stand on the floor of the basket, and never sit or climb on the edge of the basket. The load limitations of the manufacturer must be followed.

Aerial lift operators must be authorized to make use of the equipment. The operator must be familiar with all the aspects of the device and must have access to the manufacturers manual which should be kept inside the lift. Operators are responsible for ensuring that safety measures are followed in the operation of the lift. Testing lift controls on a daily basis must be done. Position outriggers and set brakes (if they are utilized) on pads or a stable surface. If working on a slope, make use of wheel chocks.

Never move an aerial lift truck with an elevated boom whilst personnel are in the basket. Extensible boom platforms and articulating boom utilized as personnel carriers should have accessible, plainly marked, upper controls. Except in emergency conditions, lower controls must not be used to override upper controls unless authorization has been given by the individual in the lift.

Do not wear tree or pole climbers shall whilst working from an aerial lift.

Do not alter the insulated portion of the aerial lift.

Ensure that the booms are thoroughly checked, that the machine is properly cradled and the outriggers are in the stowed position before moving.

When operating a boom lift next to power lines, ensure the lines are di-electrically tested based on local rules.
