

## Aerial Lift Train the Trainer Coquitlam

Aerial Lift Train the Trainer Coquitlam - The train the trainer program intended for aerial lifts helps to teach the trainers how to safely train prospective operators in an industrial situation. Trainers would be provided with in-depth instruction about the workings of aerial lift machinery. The program is provided on an open enrollment basis and delivered at selected training locations. Before the certification, trainers are assessed and scored on their demonstrated skills and knowledge.

The Aerial Lifts Train the Trainer Certification Program emphasizes practical learning. As the number one training provider in the business, we give the best hands-on training possible through chances to practice techniques and concepts taught inside the classroom. Together with hands-on experience, trainers develop general understanding of machine theory and instructional techniques, field and classroom communication skills, and ability to effectively train and assess operators. Trainers will gain knowledge about what traits make a successful trainer.

The Aerial Lift Train the Trainer Certification Program teaches the instructional techniques involved in communicating concepts in a classroom and/or field condition. Knowledge needs a training part to be effective in workplace environments. There are three aspects of equipment operation which the trainer must learn how to convey to operators: what to do; how to do it; and why it must be carried out.

The program provides up-to-date, detailed reference material to help trainers convey the subject matter to machine operators. Instruction manuals contain detailed information on all aspects of industrial mobile equipment operator training. Incorporated in the package are training aids that provide a visual reference in order to improve the learning experience. The equipment-specific training products contain essential materials meant for both the operator and the trainer: videos/DVD's, overhead transparencies, equipment models, safety message posters; digital training aids and stability pyramid.
