

## Boom Lift Training Coquitlam

Boom Lift Training Coquitlam - Aerial platforms or likewise known as elevated work platforms are devices that allow workers to perform duties and tasks at elevated heights which would not be otherwise accessible. There are different aerial lifts available to carry out different applications under different site conditions. If not carefully operated, elevated work platforms could cause death or serious injury. The most common reasons for related accidents are falls, electrocution, tip-overs and crushed body parts. Lift operators must be fully trained in techniques to avoid accidents during the operation of lifts.

Aerial Lift Safety program is designed for people who should operate the devices more effectively and safely. The course provides thorough instruction on the most used lifting devices in the business.. Types of lift covered include boom supported, scissor and articulating aerial lifts. The video presents the right methods operators must follow. Instruction focuses on protection against falls, pre-operational check, safe driving procedure and stability of the device.

The boom lift training program would help to deal with equipment reliability and employee safety, making use of materials that are fully compliant with your regional and local regulations and requirements. Course management and training methods will be taught. The trainer will likewise know the technical aspects of aerial lift safety.

Both practical training and classroom training are components of the Aerial Platform/Boom Truck Training program. Both sessions must be completed successfully for the participant to be given a certificate of achievement.

The self-propelled boom-supported elevating work platforms are different from the self-propelled elevating work platforms in that they are able to position their work platforms totally beyond the base of the machine. The theoretical training component is practically identical for both types. The practical training part could be finished sooner if only one kind of machine is utilized.

Elevating Work Platform Training Program Objectives:

For safely operating Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms, boom lift training would help operators use their machines more efficiently and would reduce the chances of accidents in the workplace. Trainees will review of company policies and applicable rules, discuss Due Diligence, review Criminal Negligence and consequences to employers, trainers, workers and supervisors. Participants would study machine features, operating procedures, stability, charging/fueling procedures and parking. Site-specific safety matters will be addressed.
